7808 tCO₂e
-  Certified Improved Cookstoves installed:
1466

Data updated to January 2025.

Utsil Naj Honduras Project, Copan

Program certified by:

Utsil Naj contributes with 11 SDGs:

The positive impacts on our communities and our planet are carefully measured and reported as contributions towards achieving the Sustainable Development Goals (SDGs) defined by the United Nations.

Rural open cookstoves negative impacts

Air pollution (CO₂)

Lung/heart diseases

Pressure on forests

Health deterioration

Frequent wood collection

Rural open cookstove reference (Honduras)

Impacts and benefits of the Program*

The Utsil Naj Program has a triple impact:

In addition to the **environmental impacts** generated by the Program, Utsil Naj has a profound **social and economic impact**, as it reduces the risk of heart and respiratory diseases, and reduces the time spent on stove-related tasks.

The income from the sale of low-carbon contributions are fully reinvested in our Projects. This includes awareness campaigns and capacity building activities that help encourage more members of vulnerable communities to adopt this technology.

Let's keep the Utsil Naj Honduras Project active!

Positive benefits:

Emissions reduction (CO₂)

Pressure reduction on forests

Additional time

Better family health

Overall well-being

*Based on the latest verification of the Utsil Naj Program (2018).

Gold Standard
for the **Global Goals**

United Nations
Framework Convention on
Climate Change

María Guerra

Hacienda Grande Community - Copan, Honduras

“The benefits of this stove are very good because I save a lot of firewood, and the food tastes better (...) I have been using this stove for many years, and it is very useful to me.”

María Ana Martínez

San Pedrito Community - Copan, Honduras

“I used to cook on a clay stove (open fire), but ever since I received the improved stove, I cook everything on it, and it's very quick.”
